The U.S. Will Soon Be a Complete Digital Concentration Camp | Nothing is being hidden, it is just being ignored

> *"Closed minds lead to the opening of concentration camps and gulags."* **~ Dean Cavanagh**

The above quote by Cavanagh while prescient, does not go far enough. Apathetic and indifferent minds leads to the opening of concentration camps and gulags. Those who hide from the truth, those who bury their heads in the proverbial sand, those who are so afraid of reality that they ignore it, those who pretend not to see, and those who run and hide are a threat to all. Sadly, this is the nature of most all Americans who are seemingly blind, and never learn any lesson in the face of tyranny, no matter the blatant and unambiguous severity of that lesson.

When Americans ignore genocide, genocide supported and paid for by this government, participated in by this government and its military, while understanding that Trump's near entirety of his Cabinet are Zionists, and unapologetic Jews supporting any and all manner of murder and slaughter of innocents, then why would they balk at being taken over and subjected to this country's rulers building an AI, transhumanistic, and technocratic system to run and control everything? If Americans ignore sex trafficking, child molestation, and possible pedophilia by this same ruling class, then why would they ever stand against the tyranny and totalitarian onslaught against them? Well, so far they have done little to nothing to stop this psychopathic and evil behavior, and have actually turned away so as not to see. This does not bode well for any future of actual freedom.

The worry about AI and transhuman alteration is extremely legitimate, and in my mind would signal the end of earth and its inhabitants as currently known to all, but how far along are we already, but too uninformed to figure out? Who is actually running this country and the world, and are they seen or unseen? How many humans; especially in the ruling realm, who have been biologically modified, and are far advanced from normal society, are there? Do not take this question lightly, as there is a reason that the intentional indoctrination and dumbing down of humanity has been in place for a century or more. Why else would the human race be so detached and complacent as to disregard the fantastical amount of carnage and totalitarian aggression that has taken place in such a short amount of time? Why has the moral fiber of the average human nearly disappeared, all in the face of the unconscionable horror and terror that is now commonplace?

Some believe that aliens from space or some unknown entity from afar are controlling earth and all its people, but no one in this world has ever left it, (no one even landed on the moon) or proven any existence of outside controlling beings. I believe this is due to this space being a captured environment, sealed if you will, meaning we live in a fully contained system. In addition, I also believe that the technology we see and are told exists, is far more advanced than even fathomable; lightyears ahead in fact. If that is so, it would explain the unexplainable, and lead one to grasp that we know absolutely nothing about the mystery that is this life, and everything going on worldwide. How many minds have already been altered so that they see only what they are allowed to see by the so-called ruling 'elites, or is this apathetic ignorance just a product of indoctrination, intense propaganda, and natural human frailty?'

But let us get back to the big picture, and the problems at hand, which entail understanding that the **AI, biometric, biologically-altered future we face, will land the bulk of this population into digital concentration camps**. This is not rhetorical hyperbole, it is happening openly, and is being telegraphed and implemented every single day, and at a vastly accelerated pace. Trump has expressed his desire publicly to have biometric tracking of every single human here. Even the charlatan, RFK Jr., has stated in front of cameras that he wants every person in the U.S. to have a "wearable" within four years. **Nothing is being hidden, it is just being ignored.**

We are edging closer and closer to a fully contained, completely surveilled, poisoned, unhealthy, financially-controlled, and dependent society that will only be able to live under the thumb of government in forcibly assembled collectives, concentrated to certain areas. These could be called 15 minute cities or social credit system housing, but in reality, **these would be open air concentration camps**, all controlled by AI, with State enforcement always in place. This is where this heinous governing system, all run by the controlling 'masterclass,' is heading.

This does not have to be done by violent force, although this tactic will be used at times against those who actually oppose, disobey, and actively dissent, but that is only possible if most of the sheep simply fall in line to be sheered instead of standing against their own enslavement, as has been the case so far. The linchpin of this dastardly plot will be the total reset of all financial, monetary, and economic systems;

this allowing for mass control over this population. **When all transactions are digital, the rulers will have won,** and the people will have become willing slaves.

The evil Trump's recent so-called "Crypto Week" tyranny is telling of what is to come. It consists of three bills, of which the GENIUS Act was already passed by Congress and signed by Trump. They include the 'GENIUS Act,' the CLARITY Act, and the Anti-CBDC Surveillance State Act. This is an absolute economic nightmare, and a way to enrich the rich, **prop up the failing dollar by allowing massive money printing and debt**, and turn all monetary systems into a **fully State-controlled network**. The **Anti-CBDC portion is used as a cover** for an even worse system, as the "GENIUS" Act will build a multi-trillion dollar 'stable' coin market between State and Federal 'authorities.' It will allow the issuance by banks and non-bank entities, with federal regulation. **The backing is by dollars, completely unstable, and worthless U.S. treasuries, which no one worldwide wants to own**, but **these criminal political maneuvers will force the purchase of these valueless IOUs**. Consider that these **'stable' coins will be CBDCs on steroids,** and will create a back-door for government and reprehensible private entities.

So go ahead and sit on your ass texting and playing games, while America burns, because once all these systems are in place, it will be too late to turn back the clock and fix what most of you voluntarily allowed to happen. You will literally have nothing and supposedly be happy. Good luck with that.

We do live in a full-blown Barnum World after all!

> *"Isn't it ironic that a nightmare can masquerade as a dream?"* **~ Ken Poirot**
